	12.	Stendal, determined that empty boxcars were assembled at all the stations through which he passed. Source expressed the belief that, on 17 July, the troop came in Letzling Heath was occupied to capacity and that it was more heavily occupied than in preceding years but not than prior to the demonstrations in June. Source had the impression that the troops had resumed training.	25X1
25X1A	1.	Comment. The information tends to indicate that the known camps in Letzling Heath were occupied as prior to the demonstrations and that training was resumed.	25X1A
25X1A	2.	Comment. The information on the partial occupation of the two installations indicates that units of the 19th Gds Necz Div probably were at exercises in the Letzling Beath in mid-July.	
25X1A	3.	Comment. The train, which source observed on 19 July, probably carried units of the 220th NV Tank SF Regt of the Eighth Gds Army which, according to reports on transportation, went to Glauchau under shipment-record No 61617. The other movements probably were made in connection with the tank firing practices in the Letzling Stath and involved tank units of the Eighth Gds Army who went to, or returned from those exercises.
